This is in regard to support of the XM Satellite Radio stations maintaining their abilities to broadcast immediate weather and traffic reports. This is a service I pay for, and who has the right to tell me what to listen to, when I pay for what I choose to listen to. This is also against my first ammendment rights. I also use this service to plan my work schedule for the safety of myself and others on the road. This service enables me to reroute trucking a load if the weather or traffic conditions are poor. Often I am not in an area to receive local radio programming. I have been told that other items, such as NAFTA act, create competition to make our country strong. Now (as you boldly sold us NAFTA, which also hurts the American trucking industry) you are trying to dictate and eliminate competition. If local radio offered a viable service I would listen to their programming. I intend to contact my local respresentatives and senators of my support of the program. Should they ignore my support I will actively seek new representatives that will cut the funds of the FCC, so as not to regulate the quality of my life. Thank you for your time regarding this manner. Dean Allen Hartwig
